PQA-1 - Header

Feature	Scenario	Steps	Test Result
Header	See full name in the header section Regression	Given the recruiter is in the web portfolio When visit the header section Then you must see the name "Maria Busto"	Passed
Header	See Title in the header section	Given the recruiter is in the web portfolio When visit the header section Then you must see the title "Functional QA"	Passed
Header	Visit Github link	Given the recruiter is in the web portfolio When visit the header section And click on the Github link Then you should see the Github page "https://github.com/MariaBustoQAOrganization/portfolioqa"	Passed
Header	Visit Linkedin link Regression	Given the recruiter is in the web portfolio When visit the header section And click on the Linkedin link Then you should see the Linkedin page "https://www.linkedin.com/in/maría-busto-gómez-590035257/"	Passed

PQA-2 - About me

Feature	Scenario	Steps	Test Result
About me	See introduction section	Given the recruiter is in the web portfolio When visit the about me section Then you should see a presentation of the user "Manual QA with experience in software testing and quality assurance. Meticulous and detail oriented."	Passed
About me	See list of skills	Given the recruiter is in the web portfolio When visit the about me section Then you should see a list of user skills Examples: Skill Functional testing Test case design	Passed

Feature	Scenario	Steps	Test Result
		Bug identification and reporting Requirements analysis	

PQA-3 - Projects

Feature	Scenario	Steps	Test Result
Projects	See project section Regression	Given the recruiter is in the web portfolio When visit the projects section Then must see , , , , Examples: title role description tool methodology Reset password QA Manual - Perform functional tests on the application JIRA, TestRail Agile - Accurate bug identification and reporting B2B agents QA Manual - Design and execute test cases JIRA, TestRail Agile - Perform functional tests on the application - Accurate bug identification and reporting Portfolio QA QA Manual - Developed a responsive web portfolio using HTML5 and CSS3 JIRA, Github - Designed test cases using Gherkin and BDD principles	Passed
Projects	Visit GitHub link Regression	Given the recruiter is in the portfolio When visit the projects section And visit the project github link Then you should see the github page Examples: Projects URL Reset password "https://github.com/MariaBustoQAOrganization/Reset-password" B2B agent "https://github.com/MariaBustoQAOrganization/B2B-agents" Portfolio QA "https://github.com/MariaBustoQAOrganization/portfolioqa"	Passed

PQA-4 - Training

Feature	Scenario	Steps	Test Result
Training	See training section Regression	Given the recruiter is in the web portfolio When visit the training section Then must see , , Examples: Training Institution Year Bootcamp QA Bootcamp QA 2025 ISTQB Gasq 2024 Higher Degree Commerce and Marketing IES Salvador Rueda 2009	Passed

PQA-5 - Contact

Feature	Scenario	Steps	Test Result
Contact	See the fields in the contact form	Given the user is in the web portfolio When visit the contact section Then you should see a title in the form field Examples: Title Email Subject Comment	Passed
Contact	Send the form with the subject field containing 41 characters	Given the user is in the contact form When fill in all fields And fill in the message in the subject field "Testing the limits of character count is " Then you see that you cannot add more than 40 characters in the fear field And the form is sent	Passed
Contact	Submit the form with the description field with 500 characters	Given the user is in the contact form When fill in all fields And fill in the message in the description field "Testing the limits of character count is a useful way to ensure that a system can handle large inputs without losing accuracy or performance Its essential for developers to verify that their applications can process data efficiently especially when handling user inputs or generating content dynamically By thoroughly. testeestestest testing these aspects we can guarantee a smoother user experience and avoid unexpected issues that might arise due to character overflow or formatting problems testes" Then you should see the message " your request has been sent successfully " And the form must be sent	Passed

Feature	Scenario	Steps	Test Result
Contact	Send the form with all the correct fields Regression	Given the user is in the contact form When the user fills in all fields And click on submit the form Then you should see the message "your request has been sent successfully"	Passed
Contact	Submit form with empty email field Regression	Given the user is in the contact form When fill in the form fields And leave the email field empty And click on submit the form Then you should see the error message "the email field cannot be empty"	Passed
Contact	Send form with empty subject field	Given the user is in the contact form When fill in the form fields And leaves the subject field empty And click on submit the form Then you should see the error message "the subject field cannot be empty"	Passed
Contact	Send form with empty description field	Given the user is in the contact form When fill in the form fields And leaves the description field empty And click on submit the form Then you should see an error message "the description field cannot be empty"	Passed
Contact	Send the form with the subject field containing 40 characters	Given the user is in the contact form When fill in all fields And fill in the message in the subject field "Testing the limits of character count is" Then you should see the message " your request has been sent successfully " And the form must be sent	Passed
Contact	Submit form description field with 501 characters	Given the user is in the contact form When fill in all fields And fill in the message in the description field "Testing the limits of character count is a useful way to ensure that a system can handle large inputs without losing accuracy or performance Its essential for developers to verify that their applications can process data efficiently especially when handling user inputs or generating content dynamically By thoroughly.." Then you see that you cannot add more than 500 characters in the fear field And the form is sent	Passed
Contact	Submit form with incorrectly formatted email field Regression	Given the user is in the contact form When fill in all fields And you fill in the email field with the wrong format Then you should see an error message " Incorrectly formatted email " And the form should not be sent	Passed
